

GEORGINA

Subject: 2024 Construction Update

To: Mayor and Council

From: Michael Vos, Director, Operations and Infrastructure

Date: April 10, 2024

Briefing:

Staff from various departments have been busy preparing for the upcoming construction season in Georgina. In advance of construction activity, Staff aim to communicate a project, its location and potential impact prior to commencement. This is completed via several communication methods including council briefings and reports, social media campaigns, on-site signage for key projects, direct mailers to impacted addresses, posts to the general disruptions page, email blasts, and website updates.

This year, as an enhancement to the previous years' communication program, the Town has added all construction activities to one web portal, easily accessible from your desktop or mobile device. This portal includes a web map that identifies work locations and a brief description of the work taking place. Timeframes for work have not yet been added to the portal, but staff aim to explore this option in the future. Specific timeframes for work commencement will be communicated to affected properties and residents via direct mailer in advance of work.

In addition to the digital map, the attached appendices provide a line-by-line description of the work scheduled for 2024 and the potential impacts of the work.

The listing has 4 headings, defined as:

Ward: The ward within the Town of Georgina in which the work falls

Location/Asset: The specific asset, location, facility or park where work will be occurring

Item Description: A brief description of the work taking place within 2024

Public Impact: A brief description of the potential impact to the public

Appendix 1: Road Work

Appendix 2: Summary of other works
