Dear Nicole Boln ;

I disagree with your assessment. The entire tree is not dead. The tree is still alive and there is no issue on my side of the property.

My neighbour has been experiencing falling branches on his side of the tree and has approached me to share the cost of removing the entire tree. However, there is nothing wrong with my side of the tree and I prefer not to remove the entire tree as we can use the shade. As there is nothing wrong with my side of the tree, we would like to keep the tree on our side. However, we agree that the problematic branches should be removed.

We had an arborist coming by to assess the trees on my property and he did not declare this tree as dead and only advised that the loose branches may be removed.

I have enclosed pictures of the tree for your reassessment.

kind regards,
Tai Phuc Nham
