

I am writing with concern for my family as well as our neighbourhood. I have lived on scotia road for 5 years and throughout my time here I have had several negative interactions with the dog "Chewy" who live at 24 processor cres.

If they are in the backyard while I am walking my own dogs they viciously bark and jump up on the fence, which in my opinion is an unsafe height. The dogs are very large and can easily clear the height of the fence.

My children also frequent the pond located next to the residence, and the dogs continuously bark and jump up at the fence while they play near the forest and pond.

I believe it is in the best interest for the safety of our neighbourhood for the dogs to be muzzled, as well as an increase in the protection of the yard with a larger fence.

Please contact me if you have any further questions,

Amanda and Jeff Peat
