

To Whom it may concern,

My partner and I have lived on Black River Road in Sutton for over three years and frequently walk through the neighborhood located to the east of us on Scotia Road to Prosser Cres. We have a five-year-old Portuguese cattle dog and unfortunately anytime during our walks 24 Prosser Cres dog (the corner house that backs onto the ravine area) a large brown dog barks aggressively and stands up on his hind legs. We often walk past quickly, worried that it may jump the fence as its head surpasses the fence. Given how many young families and children are within the neighborhood, we believe that the dog should be muzzled when outside and that the owners should be proactive rather than reactive. We strongly believe that the owners should make sure the dog has proper training and discipline, as that is the duty of a dog owner.
